

agentsapp — Complete Screen Architecture & Workflow Document

This document contains the complete high-level architecture of all screens, modules, stakeholders, and workflows for the agentsapp ecosystem. Each screen is designed as a modern WhatsApp-first operational SaaS interface.

PUBLIC WEBSITE

1. Landing Page

Purpose: Operational interface for Landing Page.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

2. Features Page

Purpose: Operational interface for Features Page.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions

Analytics	Realtime engagement metrics
-----------	-----------------------------

3. Pricing Page

Purpose: Operational interface for Pricing Page.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

4. Builders Page

Purpose: Operational interface for Builders Page.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

5. Agents Page

Purpose: Operational interface for Agents Page.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

6. Webinar & Events Page

Purpose: Operational interface for Webinar & Events Page.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

7. AI Features Page

Purpose: Operational interface for AI Features Page.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

8. Contact / Demo Booking Page

Purpose: Operational interface for Contact / Demo Booking Page.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

9. Login Page

Purpose: Operational interface for Login Page.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

10. OTP Verification Page

Purpose: Operational interface for OTP Verification Page.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets

Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

AGENT PWA

11. Agent Home Dashboard

Purpose: Operational interface for Agent Home Dashboard.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

12. Lead Pipeline (Kanban)

Purpose: Operational interface for Lead Pipeline (Kanban).

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

13. Lead Detail Screen

Purpose: Operational interface for Lead Detail Screen.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

14. Add Lead Screen

Purpose: Operational interface for Add Lead Screen.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

15. Inventory Search

Purpose: Operational interface for Inventory Search.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets

Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

16. Inventory Detail

Purpose: Operational interface for Inventory Detail.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

17. Project Detail Page

Purpose: Operational interface for Project Detail Page.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

18. Brochure Vault

Purpose: Operational interface for Brochure Vault.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

19. Saved Inventory

Purpose: Operational interface for Saved Inventory.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

20. Reminder Center

Purpose: Operational interface for Reminder Center.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

21. Reminder Detail

Purpose: Operational interface for Reminder Detail.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

22. Launch Events

Purpose: Operational interface for Launch Events.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

23. Launch Detail

Purpose: Operational interface for Launch Detail.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

24. Webinar Listing

Purpose: Operational interface for Webinar Listing.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

25. Webinar Detail

Purpose: Operational interface for Webinar Detail.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

26. Rewards & Coupons

Purpose: Operational interface for Rewards & Coupons.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

27. *Leaderboard*

Purpose: Operational interface for Leaderboard.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

28. *Notifications Center*

Purpose: Operational interface for Notifications Center.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets

Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

29. AI Assistant Chat

Purpose: Operational interface for AI Assistant Chat.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

30. Agent Profile

Purpose: Operational interface for Agent Profile.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

31. Subscription & Plan

Purpose: Operational interface for Subscription & Plan.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

32. Settings

Purpose: Operational interface for Settings.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

33. Help & Support

Purpose: Operational interface for Help & Support.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

BUILDER PWA / DASHBOARD

34. Builder Home Dashboard

Purpose: Operational interface for Builder Home Dashboard.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

35. Project Management

Purpose: Operational interface for Project Management.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

36. Create Project

Purpose: Operational interface for Create Project.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

37. Inventory Management

Purpose: Operational interface for Inventory Management.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

38. Inventory Upload

Purpose: Operational interface for Inventory Upload.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

39. *Dynamic Field Builder*

Purpose: Operational interface for Dynamic Field Builder.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

40. *Amenities Manager*

Purpose: Operational interface for Amenities Manager.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

41. *Inventory Analytics*

Purpose: Operational interface for Inventory Analytics.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

42. Campaign Studio

Purpose: Operational interface for Campaign Studio.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

43. Campaign Preview

Purpose: Operational interface for Campaign Preview.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

44. Campaign Analytics

Purpose: Operational interface for Campaign Analytics.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

45. Agent Directory

Purpose: Operational interface for Agent Directory.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

46. Agent Audience Builder

Purpose: Operational interface for Agent Audience Builder.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets

Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

47. Launch Event Management

Purpose: Operational interface for Launch Event Management.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

48. Create Launch Event

Purpose: Operational interface for Create Launch Event.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

49. Webinar Management

Purpose: Operational interface for Webinar Management.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

50. Webinar Analytics

Purpose: Operational interface for Webinar Analytics.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

51. Rewards Sponsorship

Purpose: Operational interface for Rewards Sponsorship.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

52. Coupon Distribution

Purpose: Operational interface for Coupon Distribution.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

53. Subscription & Billing

Purpose: Operational interface for Subscription & Billing.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

54. Usage Consumption Dashboard

Purpose: Operational interface for Usage Consumption Dashboard.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

55. Payment History

Purpose: Operational interface for Payment History.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

56. Invoice Center

Purpose: Operational interface for Invoice Center.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

57. Builder Profile

Purpose: Operational interface for Builder Profile.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

58. Builder Settings

Purpose: Operational interface for Builder Settings.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

SUPER ADMIN PWA

59. Super Admin Dashboard

Purpose: Operational interface for Super Admin Dashboard.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

60. Revenue Dashboard

Purpose: Operational interface for Revenue Dashboard.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

61. Platform Analytics

Purpose: Operational interface for Platform Analytics.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

62. Package Management

Purpose: Operational interface for Package Management.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

63. Pricing Engine

Purpose: Operational interface for Pricing Engine.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

64. Usage Rules Engine

Purpose: Operational interface for Usage Rules Engine.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets

Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

65. Coupon Engine

Purpose: Operational interface for Coupon Engine.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

66. Reward Engine

Purpose: Operational interface for Reward Engine.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

67. Subscription Management

Purpose: Operational interface for Subscription Management.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

68. Campaign Moderation

Purpose: Operational interface for Campaign Moderation.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

69. Fraud Detection Center

Purpose: Operational interface for Fraud Detection Center.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

70. User Management

Purpose: Operational interface for User Management.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

71. Builder Management

Purpose: Operational interface for Builder Management.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

72. Agent Management

Purpose: Operational interface for Agent Management.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

73. Notifications Management

Purpose: Operational interface for Notifications Management.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

74. System Settings

Purpose: Operational interface for System Settings.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

75. Audit Logs

Purpose: Operational interface for Audit Logs.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

76. AI Usage Monitoring

Purpose: Operational interface for AI Usage Monitoring.

Core Features: realtime updates, WhatsApp workflows, AI-powered interactions, analytics, search, notifications, and responsive layouts.

Design Style: Light-theme premium SaaS UI inspired by Linear, Stripe, Slack, and WhatsApp Business.

Key Modules: cards, analytics widgets, action buttons, realtime feeds, dynamic tables, filters, and workflow panels.

Area	Description
Header	Navigation + search + notifications
Content	Realtime operational widgets
Actions	WhatsApp workflows + AI actions
Analytics	Realtime engagement metrics

Complete Workflow Summary

Workflow	Flow
Authentication Flow	Registration → OTP → WhatsApp Verification → Role Assignment
Agent Workflow	Leads → Inventory → Reminders → Closures
Builder Workflow	Projects → Inventory → Campaigns → Analytics
Campaign Workflow	Audience → Broadcast → Engagement
Launch Workflow	Invites → RSVP → Attendance
Webinar Workflow	Registration → Rewards → Analytics
AI Workflow	Intent Parsing → Recommendations → Actions
Subscription Workflow	Package Purchase → Usage → Renewals
