

agentsapp — Production Technical Requirements & API Architecture

1. Platform Overview

Agentsapp is a WhatsApp-first operational infrastructure platform for real estate agents and builders. The platform focuses on workflows, inventory circulation, launch campaigns, reminders, and AI-assisted operations.

2. Core Stakeholders

Stakeholders include Agents/Channel Partners, Builders/Developers, Admin Teams, and Operations Teams.

3. Technology Stack

Frontend: Next.js 14, TypeScript, TailwindCSS, shadcn/ui, Framer Motion.

Backend: Supabase, PostgreSQL, Supabase Auth, Realtime, Storage.

Messaging: WhatsApp Cloud API.

AI: GPT-4o and Whisper.

Automation: n8n.

Deployment: Vercel + Supabase Cloud.

4. Authentication

Authentication is OTP and WhatsApp verification based. No passwords are used. Roles include AGENT, BUILDER, ADMIN, and OPERATIONS.

5. Agent Platform

The Agent PWA supports lead management, reminders, inventory search, brochures, launches, and notifications. Views include Kanban, List, and Calendar.

6. Builder Dashboard

Builders can upload inventory, create campaigns, manage launches, target brokers, and view analytics.

7. WhatsApp Bot

The WhatsApp bot supports lead creation, reminders, inventory search, brochure requests, status updates, and voice note workflows.

8. AI Layer

GPT-4o handles intent parsing, recommendations, reminders, and campaign drafting. Whisper handles voice note transcription.

9. APIs

Core APIs include authentication APIs, lead APIs, reminder APIs, inventory APIs, campaign APIs, launch APIs, analytics APIs, and notification APIs.

10. Security

Mandatory security includes RLS policies, JWT validation, webhook verification, audit logs, signed URLs, and rate limiting.

11. Deployment

Frontend deployment via Vercel. Backend infrastructure through Supabase. CI/CD through GitHub Actions.

12. Final Engineering Principle

The platform is workflow infrastructure powered by WhatsApp. Dashboards support workflows. WhatsApp is the core product experience.

Core API Endpoints

API	Purpose
/api/auth/send-otp	Send OTP
/api/auth/verify-otp	Verify OTP
/api/leads	Lead Management
/api/reminders	Reminder Engine
/api/inventory/search	Inventory Search
/api/campaigns	Campaign Management
/api/launches	Launch Events
/api/notifications	Notification Engine
